

Mainframe Web Services

 Ivory® Service Architect™

Global* connections made easy

* Web Services are THE new standard for interfaces in all technology worlds (.NET, Java)

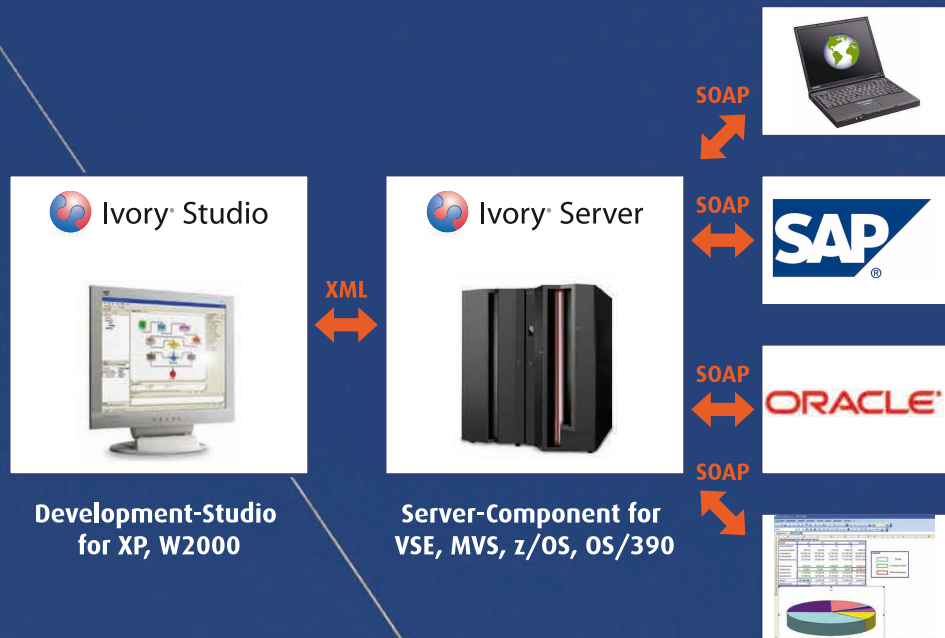

**Ivory – a product based
on 25 years of mainframe experience**

- High productivity
- IMS and CICS supported
- No coding required
- No middleware required

Visit us at our booth
Join our presentation
it includes a LIVE-Demo with Ivory
and access to a real mainframe

Ivory® Service Architect™

- Expose mainframe logic as Web Services without coding
- Mainframe programs remain unchanged
- Uses COBOL, PL/1, Batch, 3270, DB/2, IMS-DB, ...
- Usage of COMMAREA creates high speed responses
- Combination of multiple existing mainframe programs into one (1) Web Service = new function, high speed processing, easy usage
- No middleware for mainframe access required
- Ivory runs on CICS and IMS-DC as transaction or started task

Requirements

Ivory Studio

- Windows PC (W2k, XP)

Ivory Server

- MVS, z/OS, OS/390, VSE
- CICS (TS 2.2)
- IMS V 8 (restricted with 7.1)
- 2 TCP/IP ports on mainframe required
